

## ARE YOU PREPARED FOR THE EPA INSPECTION REGULATION CHANGES? ACT IS PREPARED TO GET YOU ON A MONTHLY SCHEDULE AND READY TO ROLL FOR 2021!

Advanced Compliance & Testing (ACT) in conjunction with Willborn Tank & Fuel Systems have all your fuel system compliance needs covered. Act has a team of employees dedicated specifically to all your compliance questions and concerns and are knowledgeable in all aspects of compliance for your state.

With the ever changing rules and regulations, we offer peace of mind to our customers by providing a substantial 30-day inspection reports per the EPA regulations.

ACT currently manages many of our customers 30-day compliance inspections throughout the states of Texas, New Mexico, Kansas, Colorado, and Oklahoma, providing detailed reports and photos that are available via our online portal.

All customers are given direct 24/7 access to their reports with a simple to use portal. We recognize the value of lasting relations and realize that communications is key to maintain our relationship with our customers.

### MONTHLY INSPECTIONS

- Inspection of all spill containments, STP Sumps, UDC Sumps, Removal of water, debris, and hazardous substances with proper disposal. Liquid sensors inspected.
- Inspection of dispensers. All nozzles, hoses, whip hoses, breakaways, swivels will be inspected for wear and tear, as well as leaks. Inspection of all filters, piping, doors, and displays. Inspection of all required equipment and decals, including weights and measures decals, fire extinguishers, and credit card readers are inspected for skimmers.
- While on site, we will call for approval to repair any issues found or repairs needed during the inspection saving you an additional trip for a service technician.
- ATG reviewed for water or alarms, manual sticking of tank if ATG indicates water present.
- Fuel samples can be taken and tested for microbials, while on site, if needed.
- ASTs inspection, AST piping inspected for leaks.
- UST manways and sump lids are inspected for wear, tear, and cracks.
- Impressed Cathodic Protection inspected, and rectifier reading on 30-day report.
